JANUARY 4-6

OWLS & CATERPILLARS

It is good to have all of our owls and caterpillar friends back in the classroom after our long holiday break!

They were all so excited to share about all of the new toys they had gotten; during our morning circle time we set aside some time so that each friend could share. Their listening audience's eyes lit up as they talked about new red scooters, doll houses, new princess back packs, ninja turtle pajamas, and some even shared about trips they took and how they were able to play in the snow!

It sounded as if everyone had a wonderful time during their break.

This week is a very short week in the classroom; we will finish out the week working on handwriting skills and letter recognition, among various other learning activities.

Reminder:

We will be celebrating our "Healthy Kids Day" this month. The children will participate in lots of fun exercises and activities outside, as well as make their own healthy trail mix snack and have important discussions about the importance of eating healthy and exercising each day. Our date set aside for this fun event will be announced at a later time.

Spring Field Trip:

Please read each weekly newsletter carefully so that you can be informed about the place and date for our upcoming Spring Field Trip!
